EDUCATION

Aston University, London, UK — *MSc. in Cyber Security Management*

 2025 – October 2026

North East University, Bangladesh — *BSc. in Computer Science & Engineering*

 2020 – 2025

Technical SKILLS

- **Programming Languages:** Python, C++, JavaScript, HTML, CSS
- **Frameworks & Libraries:** Django, Django REST Framework (DRF), React.js, JWT Authentication, Vite
- **Databases & Data Storage:** MySQL, Redis (Caching & Task Queuing).
- **Asynchronous Tasks:** Redis.
- **Cloud & DevOps:** AWS (EC2, S3, RDS, IAM), GitHub Actions (CI/CD), Docker & Docker Compose, SonarCloud
- **Tools & Version Control:** Git, GitHub, Postman
- **Testing & QA:** Unit Testing

Awards & Achievements

Achievements & Certifications

- **Competitive Programming:** Solved 1,500+ problems across [Codeforces](#), [LeetCode](#), and [CodeChef](#); achieved **5-Star Rating** on [HackerRank](#).
- **ICPC Dhaka Regional Contestant:** Participated in the International Collegiate Programming Contest (2020, 2024).
- **Rank 7th — IUPC 2024:** Secured top 10 position at the Intra-University Programming Contest (MU Sylhet).
- **2nd Runner-Up:** Intra-University Math Olympiad.
- **Certified Full-Stack Developer:** Completed Full-Stack Web Development (Django, React.js) certification from Ostad (2025).

Co-Curricular Activities

Mentor & Collaborator for **Competitive Programming Workshops** (North East University Bangladesh)

Projects

AI-Powered Learning Management System (LMS) | *Django, Django REST Framework, React.js, MySQL, Docker, AI/LLM Integration* [GitHub](#) 

- Architected and developed a full-stack, enterprise-grade Learning Management System featuring role-based dashboards for Students, Teachers, and Administrators.

- Integrated an AI-based Quiz Generation Module that automatically parses uploaded study materials (PDF/Docs) to generate contextual assessment questions, reducing instructor workload.
- Designed and normalized a robust relational database schema (MySQL) with 9 core entities, implementing optimal indexing and foreign key constraints for fast query performance.
- Developed secure RESTful APIs with JWT authentication and an OTP verification mechanism for user onboarding and profile security.
- Implemented real-time progress tracking, dynamic course enrollment, interactive assignment submissions, and automated quiz evaluation workflows.

Gemini 2.0 AI-Based Q&A Web Platform | *React.js, Context API, JavaScript (ES6+), Tailwind CSS, HTML5* [GitHub](#)

- Engineered a responsive AI-driven Q&A web application leveraging the Gemini 2.0 API to deliver context-aware, real-time responses to complex user queries.
- Managed global application state and dynamic conversation workflows seamlessly using React Context API and custom hooks, eliminating unnecessary prop drilling.
- Implemented persistent local storage mechanisms to cache chat histories and render a dynamic, searchable sidebar for enhanced context retention.
- Designed a modern, mobile-responsive UI using Tailwind CSS, optimizing rendering performance and ensuring cross-browser compatibility.

G-mart | *Html, CSS, Javascript, python, Django, Bootstrap* [GitHub](#)

- *Developed a full-stack e-commerce system with secure authentication and session-based cart management.*
- *Designed normalized MySQL database schemas and optimized queries for scalability.*
- *Implemented admin-level CRUD functionality and responsive UI with Bootstrap.*

Disease Predictor | *Javascript, Django, Decision Tree, Mysql* [GitHub](#)

- **Automation & DevOps:** Engineered a **CI/CD pipeline using GitHub Actions** to automate unit testing and database migrations, ensuring code integrity across environments.
- **Predictive Modeling:** Developed a health-risk prediction engine by implementing **Decision Tree** and **Logistic Regression** algorithms using **Scikit-Learn**.
- **Healthcare Logic:** Developed a secure role-based system (Patient/Doctor) with complex data models for managing symptoms and predicting potential health risks.
- **Premium UI/UX:** Implemented a high-performance, responsive interface featuring **Glassmorphism design** and dynamic **Dark/Light mode** using Tailwind and Framer Motion.
